

Indiana FIELD OFFICE TECHNICAL GUIDE

Section III - Resource Management Systems and Quality Criteria

Quality Criteria

Resource: Air

Consideration: Quality

Airborne sediment and smoke particulates On-Site and Off-Site Safety	Reduced visibility due to smoke or airborne sediment particulates are limited so that adequate visual distance (not less than one quarter mile) and visual clarity to assure safety are maintained. Applicable Federal, state, or local laws and regulations will be followed.
Airborne chemical drift - On-Site and Off-Site	Chemicals are applied according to label instructions and in compliance with applicable Federal, state, or local laws and regulations without adversely affecting humans and/or non-target plants, animals, or sensitive water bodies.
Airborne odors	Airborne odors are minimized and in compliance with applicable Federal, state, or local laws and regulations.

Consideration: Condition

Air Temperature	To be developed
Air Movement	To be developed
Humidity	To be developed
